INTRODUCTION

- A. Name of the proposed business
- B. Name of the founder (or founders)
- C. One paragraph summary of the business

PART 1: PRODUCT/SERVICE FEASIBILITY

ISSUES ADDRESSED IN THIS PART

- A. Product/service desirability
- B. Product/service demand

ASSESSMENT TOOLS

Concept Statement Test

- Write a concept statement for your product/service idea. Show the concept statement to 5 to 10 people. Select people who will give you informed and candid feedback.
- Attach a blank sheet to the concept statement, and ask the people who read the statement to (1) tell you three things they like about your product/service idea, (2) provide three suggestions for making it better, (3) tell you whether they think the product or service idea is feasible (or will be successful), and (4) share any additional comments or suggestions.
- Summarize the information you obtain from the concept statement into the following three categories:
 - Strengths of the product or service idea—things people who evaluated your product or service concept said they “liked” about the idea
 - Suggestions for strengthening the idea—suggestions made by people for strengthening or improving the idea
 - Overall feasibility of the product or service concept—report the number of people who think the idea is feasible, the number of people who think it isn’t feasible, and any additional comments that were made
- Other comments and suggestions

Buying Intentions Survey

- Distribute the concept statement to 15 to 30 prospective customers (do not include any of the people who completed the concept statement test) with the following buying intentions survey attached. Ask each participant to read the concept statement and complete the buying intentions survey. Record the number of people who participated in the survey and the results of the survey here.
- Along with the raw data recorded here, report the percentage of the total number of people you surveyed that said they would probably buy or definitely would buy your product or service if offered. This percentage is the most important figure in gauging potential customer interest.
- One caveat is that people who say that they intend to purchase a product do not always follow through, so the numbers resulting from this activity are almost always optimistic. Still, the numbers provide you with a preliminary indication of how your most likely customers will respond to your potential product or service offering.

How likely would you be to buy the product or service described above?

- ☐ Definitely would buy
☐ Probably would buy
☐ Might or might not buy
☐ Probably would not buy
☐ Definitely would not buy

Additional questions may be added to the buying intentions survey.

PART 4: FINANCIAL FEASIBILITY

ISSUES ADDRESSED IN THIS PART

- A. Total startup cash needed
- B. Financial performance of similar businesses
- C. Overall financial attractiveness of the proposed venture

ASSESSMENT TOOLS

Total Start-up Cash Needed

- The startup costs (which include capital investments and operating expenses) should include all the costs necessary for the business to make its first sale. New firms typically need money for a host of purposes, including the hiring of personnel, office or manufacturing space, equipment, training, research and development, marketing, and the initial product rollout.
- At the feasibility analysis stage, it is not necessary for the number to be exact. However, the number should be fairly accurate to give an entrepreneur an idea of the dollar amount that will be needed to launch the firm. After the approximate dollar amount is known, the entrepreneur should determine specifically where the money will come from to cover the startup costs.
- The total startup cash needed can be estimate using the following table.

Total Startup Cash Needed (to Make First Sale)

<i>Capital Investments</i>	<i>Amount</i>
Property	
Furniture and fixtures
