

1] To find the center of a given arc

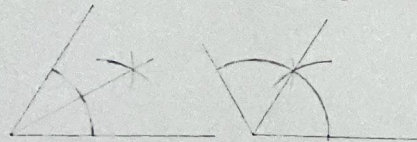

2] To draw an arc passing through 3 given non-linear pts.

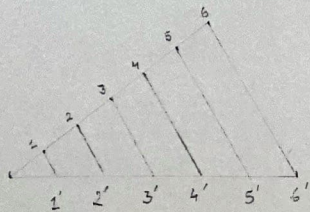

3] To bisect given angle

ACUTE

OBTUSE

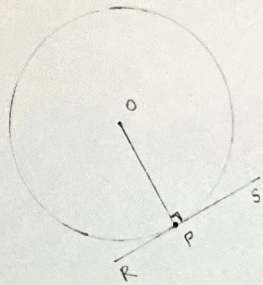

4]

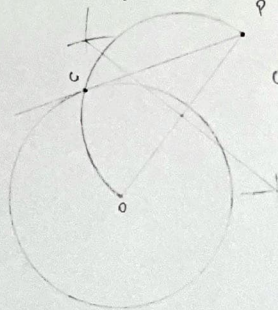

Divide a straight line into 6 different parts

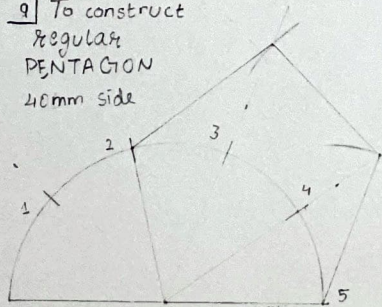

5] To draw a tangent to a given circle at any pt. P on it.

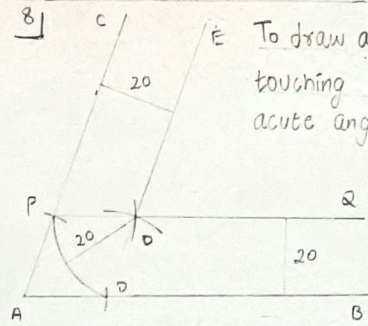

6] To draw a tangent to a given circle from a pt P outside it

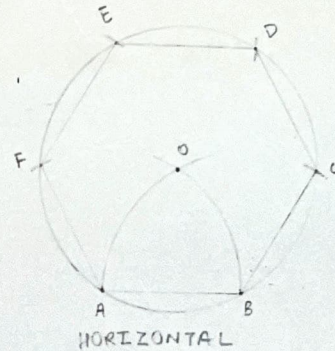

9] To construct regular PENTAGON 40mm side

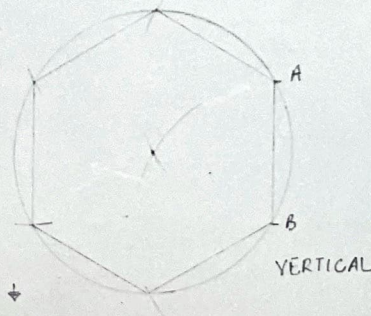

8]

To draw an arc of 20mm radius touching two given straight lines making acute angle.

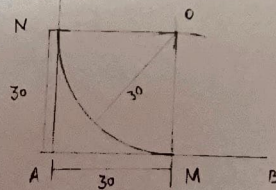

HORIZONTAL

VERTICAL

10] To construct regular HEXAGON of side 35mm

7] To draw an arc of 30mm radius to touch to touch two given straight lines at 90°

11] To construct regular OCTAGON of side 50mm
